

Dissertation Project Assignment

College Computer Major Computer Science & Technology

Class 2351520115 Student ID

Student Name

Project Title Research Paper Information Management

Start Date September 7, 2026 Completion Date December 31, 2026

Place Shenyang Aerospace University

Design Tasks and Requirements:

Design Tasks:

Write a research paper information management program. The information includes paper ID, paper title, authors, institution, publication (the name of the journal or conference), publication date, abstract and keywords. The program has the following capabilities:

1. Login the system with username and password.
2. Add a new record of paper information;
3. Delete some records of paper information;
4. Modify some records of paper information;

5. Display records of paper information;
6. Search a specified record of paper information using a paper title or author name;
7. Sort the paper information by publication date in chronological order;
8. Count the number of the paper by publication;
9. Import the paper information from a text file;
10. Export all the paper information into a text file.

Design Requirements:

1. Implement the project with Object Oriented Programming;
2. Design a friendly GUI for information management;
3. Check the data validity when entering information;
4. The main interface should have a main menu;
5. Write the project report in accordance with the specification of course design report.
